Date: 11/1/2018

Reporting Period: 11/1/2018

1. Introduction

1.1 Background

Site Number:	A28U	Contract Number:	
D.O. Number:		Action Memo Date:	
Response Authority:	CERCLA	Response Type:	Emergency
Response Lead:	EPA	Incident Category:	Removal Action
NPL Status:	Non NPL	Operable Unit:	
Mobilization Date:	10/17/2018	Start Date:	10/17/2018
Demob Date:		Completion Date:	
CERCLIS ID:	NYD088413877	RCRIS ID:	
ERNS No.:		State Notification:	Yes
FPN#:		Reimbursable Account #:	

1 Incident Category

Abandoned coke manufacturing plant releasing hazardous substances into the environment.

1.1.2 Site Description

Tonawanda Coke Corporation is a coke manufacturing plant; approximately 160 acres in an industrial area. The facility has been in operation for approximately 100 years. The 30 currently operating coke ovens have been in use since early 1960.

1.1.2.1 Location

The facility is located at 3875 River Rd, Tonawanda, Erie County, New York. The area is an industrial area adjacent to the Niagara River. The nearest residence is located approximately 0.25 miles away.

1.1.2.2 Description of Threat

Flammable liquids contained in bulk storage tanks pose a threat of fire and explosion should they encounter an ignition source. Sodium hydroxide, a corrosive material, has been discharged onto the ground and poses a health threat to anyone who may come in contact with this material. One scrubber tower contains a pyrophoric material which may spontaneously combust if the nitrogen blanket inside the vessel is not maintained. Drums of hydrochloric acid and solvents are being stored on an unpaved surface without secondary containment. A full removal site evaluation will be conducted and addressed following facility

shutdown.

1.1.3 Preliminary Removal Assessment/Removal Site Inspection Results

EPA is evaluating the Site, to identify all areas of concern and determine which facility operations will require EPA's immediate attention to circumvent a release of hazardous substances to the environment.

2. Current Activities

2.1 Operations Section

2.1.2 Response Actions to Date

See previous POLREPS for additional response actions.

All boiler and process operations necessary to treat the contaminated aqueous waste streams stored/generated on-site are continuing. Pipe lines were refitted in preparation to pump the weak ammonia liquor in the South Weak Ammonia Liquor Tank to the North Weak Ammonia Liquor Tank. Areas of heavy vegetation were cleared to provide access for the hoses. A rented diesel pump and hose were mobilized to the site today to make the transfer. The vendor however took longer than scheduled to make the connections to the system. As a result, the transfer operation was rescheduled to begin tomorrow, November 2, 2018. Drums and other containers scattered throughout the Site continued to be collected and brought to the containment areas

2.1.3 2.1.3 Enforcement Activities, Identity of Potentially Responsible Parties (PRPs)

TCC filed for bankruptcy on October 16, 2018. ORC continues to represent EPA's interest with TCC attorneys.

2.1.4 Progress Metrics

<i>Waste Stream</i>	<i>Medium</i>	<i>Quantity</i>	<i>Manifest #</i>	<i>Treatment</i>	<i>Disposal</i>

2.2 Planning Section

2.2.1 Anticipated Activities

1. Continuing operating the boiler and supporting systems.
2. Continue running the Ammonia Still System to treat the weak ammonia liquor and other generated aqueous waste.
3. Continue to pump the contaminated water from the containment and sump areas for treatment in the Ammonia Still System.
4. Conduct a cleanup of the contaminated soil around six different sump areas to mitigate the cross contamination of surface water.
5. Move all containers and vessels containing hazardous substances, pollutants or contaminants, which are currently improperly stored, to a containment area.
6. Continue to maintain and monitor both the plant process water and the surface storm water systems
7. Sample, analyze, remove and ship the hazardous substances, pollutants or contaminants in plant process vessels for disposal.
8. Clean and subsequently remove the plant process containment areas.

2.2.1.2 Next Steps

EPA will continue to assess the potential public and environmental threats posed by the Site.

2.2.2 Issues

Electrical and mechanical breakdowns continue to occur due to the antiquated, poor condition of the plant equipment.

2.3 Logistics Section

No information available at this time.

2.4 Finance Section

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
ERRS - Cleanup Contractor	\$550,000.00	\$0.00	\$550,000.00	100.00%
Intramural Costs				
Total Site Costs	\$550,000.00	\$0.00	\$550,000.00	100.00%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.

2.5 Other Command Staff

No information available at this time.

3. Participating Entities

3.2 Cooperating Agencies

EPA is coordinating with, DOJ, NYSDEC and the Town of Tonawanda Water Resources Department.

4. Personnel On Site

One OSC, 11 ERRS personnel and two RST3 personnel.

5. Definition of Terms

No information available at this time.

6. Additional sources of information

7. Situational Reference Materials

No information available at this time.
